

Laporan Praktikum Praktikum 1
Pemrograman Mobile

Disusun oleh:

Muhammad Aditya (20240801234)

PROGRAM STUDI TEKNIK INFORMATIKA
FAKULTAS ILMU KOMPUTER
UNIVERSITAS ESA UNGGUL
2026

- Bagian C – Mengenal Struktur Proyek

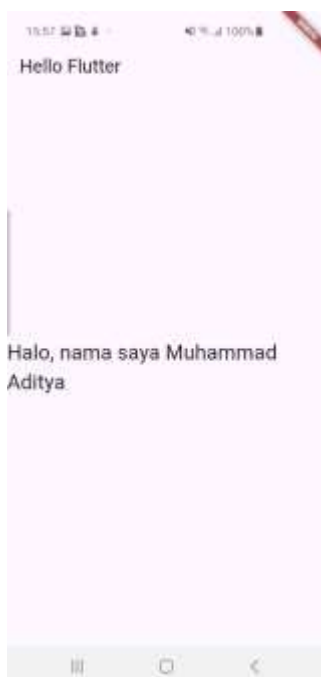

Sintaks	Penjelasan Fungsi
lib/main.dart	Titik masuk aplikasi, berisi kode utama yang dijalankan pertama kali.
pubspec.yaml	Berkas konfigurasi proyek: nama, versi, daftar dependensi (package), dan aset.
android/, ios/	Berisi kode dan konfigurasi khusus platform native Android dan iOS.
test/	Tempat berkas pengujian (unit test/widget test) aplikasi.

- Bagian D – Aplikasi “ Hello Flutter ”

```

1 import 'package:flutter/material.dart';
2
3 void main() {
4   runApp(const MyApp());
5 }
6
7 class MyApp extends StatelessWidget {
8   const MyApp({super.key});
9
10  @override
11  Widget build(BuildContext context) {
12    return MaterialApp(
13      title: 'Praktikum 1',
14      home: Scaffold(
15        appBar: AppBar(title: const Text('Hello Flutter')),
16        body: const Center(
17          child: Text(
18            'Halo, nama saya Muhammad Aditya ',
19            style: TextStyle(fontSize: 24),
20          ),
21        ),
22      ),
23    );
24  }
25 }

```

- Bagian E – Widget Layout Dasar

Body diubah menjadi Column agar ikon dan beberapa baris teks tersusun vertikal:

```

1  import 'package:flutter/material.dart';
2
3  void main() {
4    runApp(const MyApp());
5  }
6
7  class MyApp extends StatelessWidget {
8    const MyApp({super.key});
9
10   @override
11   Widget build(BuildContext context) {
12     return MaterialApp(
13       title: 'Praktikum 1',
14       home: Scaffold(
15         appBar: AppBar(title: const Text('Hello Flutter')),
16         body: Center(
17           child: Column(
18             mainAxisAlignment: MainAxisAlignment.center,
19             children: const [
20               Icon(Icons.flutter_dash, size: 88, color: Colors.blue),
21               SizedBox(height: 16),
22               Text('Halo, nama saya Muhammad Aditya ', style: TextStyle(fontSize: 20)),
23               Text('NIM: 20240801234'),
24             ],
25           ),
26         ),
27       ),
28     );
29   }
30 }

```

Sintaks	Penjelasan Fungsi
Column	Menyusun widget-widget anak secara vertikal (dari atas ke bawah).
mainAxisAlignment: MainAxisAlignment.center	Mengatur perataan anak-anak Column pada sumbu utama (vertikal) agar berada di tengah.
Icon	Menampilkan ikon bawaan Material (di sini Icons.flutter_dash) dengan ukuran dan warna tertentu.
SizedBox(height: 16)	Memberi jarak kosong vertikal sebesar 16 piksel antar widget.

- Bagian F – Widget Interaktif (StatefulWidget)

```

mandet X
1 import 'package:flutter/material.dart';
2
3 void main() {
4   runApp(const MyApp());
5 }
6
7
8 class MyApp extends StatelessWidget {
9   const MyApp({super.key});
10
11   @override
12   Widget build(BuildContext context) {
13     return const MaterialApp(
14       title: 'Praktikum 1',
15       home: CounterPage(),
16     );
17   }
18 }
19
20 class CounterPage extends StatefulWidget {
21   const CounterPage({super.key});
22
23   @override
24   State<CounterPage> createState() => _CounterPageState();
25 }
26
27 class _CounterPageState extends State<CounterPage> {
28   int _count = 0;
29
30   @override
31   Widget build(BuildContext context) {
32     return Scaffold(
33       appBar: AppBar(title: const Text('Counter Saya')),
34       body: Center(
35         child: Text('${_count}', style: const TextStyle(fontSize: 48)),
36       ),
37       floatingActionButton: FloatingActionButton(
38         onPressed: () => setState(() => _count++),
39         child: const Icon(Icons.add),
40       ),
41     );
42   }
43 }

```
